

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP100

☒ All GE foods should be labeled so I am informed and have a choice.

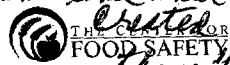

☒ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

*Indiscriminate (perhaps ANY) GE of our foods will bring on us famines & starvation. As Einstein said, "The world that we have made thus far creates problems which can't be solved at the same level that*
